GAU-2B/M134 MINIGUN MODERNIZATION/UPGRADE KIT

In addition to new production M134D Miniguns, Dillon Aero also provides a GAU-2B/M134 Minigun Modernization/Upgrade Kit for early generation General Electric (GE) GAU-2B/M134 Miniguns. The kit ensures that hundreds of Miniguns, formerly rendered obsolete by poor reliability and a shortage of spare parts may be brought up to current standards.

FEATURES

1. Feeder/Delinker
2. Clutch Assembly
3. Bolt Assembly (6 each)
4. Removable Track (6 each)
5. Gun Control Unit (GCU)
6. Spade Grip
7. 3,000-round Gear Head and Gun Drive Motor
8. Top Cover and Safing Blade Assembly
9. One-piece Barrel Clamp

Through the replacement of legacy components with the improved design of new production Dillon components, early generation GE Miniguns will deliver highly increased reliability and performance.
