# M134D Minigun

The Dillon Aero M134D is one of the most reliable weapons in the world, given its capacity, simplicity in loading, and ease of maintenance. Designed for speed and accuracy, the M134D is a true force multiplier. The rapidity of shooting is of the utmost importance: only guns as rapid as the M134D can achieve the extreme shot density needed to suppress multiple targets in compressed periods of time. Additionally, the M134D is virtually free of recoil. When properly mounted, it moves slightly aft with the first shot, without any tendency to pitch or yaw. This stability is vital, in that it significantly assists in the aiming on and retention of a target. High rates of fire, extremely dense shot grouping, and high weapon stability demonstrate the perfect pairing of swiftness and precision.

## FEATURES:

- Chambered in 7.62x51mm NATO with available magazines in up to 4,000 round capacities.
- Fixed firing rates of 3,000 Rounds per minute (50 Rounds per second).
- Averages an impressive 30,000 Rounds between stoppages.
- 1/50th of a second between each shot = four rounds fired from the M134D in the time it takes to fire a single round from an M240.
- Four-fold reduction in the amount of time needed for gunner to see his hits and adjust aim, leading to an average of nine times more hits.

Part Number: M134D  
NSN: 1005-00-903-0751

WEIGHT  
Fixed Forward Fire: 56.9 lbs - 27kg  
Crew Served Gun: 66.1 lbs - 30kg
