ROUNDS COUNTER Chute Clamping

HOVERCRAFT MOUNT

Griffon 2000TD Turret System

The Chute Clamping Rounds Counter allows the user to keep track of fired rounds. It is designed to work with BOTH Standard Armament AND Nobles feed chutes using 7.62mm NATO ammunition belted with M13 links.

The system can connect anywhere along the feed chute, and the the quick-locking latch ensures easy install and removal without the risk of accidental disconnection in high movement/vibration environments.

This system uses touchless optical sensors and is able to count in both directions, minimizing miscounts in high vibration environments.

COMPONENTS:

- Dual Chute Compatibility with both Standard Armament and Nobles 7.62 Feed Chute Types
- O-ring sealed, ruggedized aluminum housing is suitable for harsh environments
- Field serviceable CR123A batteries (2) power unit up to 2.5 yrs
- Quick-locking over-center latch attachment mechanism
- Dual-Button interface for easier menu navigation and setup
- Programmable total and trip counters
- Configurable counter modes for loading, unloading and regular operation.
- High-Contrast matrix display provides easy legibility in all lighting conditions.
- Backlighting is adjustable for dimming and NVG environments
- Display readout can be rotated electronically via menu settings for ease of readability in a variety of mounting locations

WEIGHT: Appx. 2.5 LB
